

Technology Litigation

Technology cases necessitate astute legal thinking, technical expertise and extensive industry experience. Morris, Manning & Martin's Technology Litigation Practice provides clients all of this and more with our firm's representation.

Key Services

- Breach of contract
- Confidentiality & noncompete agreements
- Copyright infringement
- Deceptive trade practices
- Patent infringement
- Tortious interference
- Trade secrets
- Trademark infringement
- Unfair competition

Advocates Nationwide

Our Technology Litigation Practice handles cases involving the full range of disputes that arise in the life of technology businesses including software copyright, trademark and patent infringement, licensing and development, misappropriation of trade secrets, breach of confidentiality or non-compete agreements, movement of key employees between companies, and tortious interference with business and contractual relationships. We represent clients in state and federal courts throughout the U.S., and have appeared as lead counsel in the courts of more than 30 states and U.S. territories. Since 1987, we have served technology clients ranging from publicly traded, *Fortune* 500 companies to individual inventors and startup ventures.

Technically Proficient

We recognize that technology disputes involve unique legal and business issues. Our technical understanding has been informed by working with leading firms in computer hardware and software, medical devices and life sciences, outsourcing and consulting, Internet, e-commerce, privacy, electronic contracting, and telecommunications industries. Morris, Manning & Martin's technology litigators bring to each matter a high level of litigation expertise and a practical understanding of the technology, while also remaining focused on the relationship between the disputes and our clients' pursuit of their business and personal goals.

Agile Partners

Our technology litigators work closely with colleagues in other practice areas at the firm, such as employment, intellectual property and technology transactions to fully serve our client's case. We vigorously defend our clients' positions with thorough legal arguments and research based on the latest technology developments. Recognizing that litigation often can be an unwanted, distracting and time-consuming process for our clients, our lawyers often counsel clients on courses of action that will minimize the necessity of litigation and maximize their position in the event litigation arises.
